December 9, 1969

Mr. Kermit Geary
R. D. 2, Box 298
Walnutport, Pa. 18088

Dear Kermit,

Your letter of November 30th was handed to me by the station manager when I returned from vacation on the 8th of December. (I had been deer hunting up at lake Wallenpack, with no luck.) It certainly was a pleasure to receive your letter on my return to work. I wish we had more listeners like you. I myself, and our Engineering staff cannot thank you enough for your interest in our station. I have verified the copy of the program of November 30th, and I find it very accurate. As for the technical information you require, I hope the following information will be suitable.

WPNA 94.1 MHz
Effective radiated power of 20 KW
Antenna height 170 Ft., above average terrain
Overall antenna height of 253 Ft.
Antenna type RCA BF 5A
Transmitter output power 4.6 KW
Transmitter type RCA BTF 5B

All the staff at WPNA wish you and yours a very happy holiday season.

Yours truly,

Buz Kleine
Chief Engineer
